Welcome to our latest newsletter! We're pleased to share some recent achievements and HIS updates. Stay connected with our community and receive firsthand details about recent events, industry news and more.

Hargreaves Industrial Services welcomes Nine new customers

We are pleased to share that Hargreaves Industrial Services has welcomed nine new customers over the last financial year. This achievement underscores our commitment to providing exceptional service in the industrial and engineering sector.

With these new partnerships, we are not only expanding our reach but also reinforcing our reputation as a leader in the industry. This milestone opens up new opportunities for us to innovate and further enhance our offerings.

Last Chance to Vote

Hargreaves Industrial Services has been nominated for the CCE Magazine Supplier Innovation Awards' for the category of Most Innovative Materials Handling Solution.

This recognition means a lot to us, and although we cannot vote for ourselves as votes won't be counted, we encourage you to share this with your clients, partners, and wider network — every vote helps!

Please see the voting link below. See link in our BIO to vote for us.

Voting closes at 5pm (GMT) on Friday, 16th May 2025.

The CCE Magazine also caught up with Managing Director Sean Hager & Proposals Director Lucie McDermott about our growth strategies for 2025.

See link in BIO to read the full article.

HIS Maintains Level 5 RoSPA Award

We are pleased to share that we have recently maintained our Level 5 RoSPA Award. This is an overall improvement since our last audit - with a score increase of 3%, from 94% to 97% overall.

HIS SHEQ Manager, Dave Turner, said, "This is an exceptional achievement for HIS; achieving and maintaining this standard of report and level of award is not easy. Thank you to each of our teams for their collective efforts in looking after our people, following our systems and maintaining high standards on our sites."

Employee Spotlight: Lee Nelson - Operator Maintainer

This month, we are shining the spotlight on operator maintainer Lee Nelson, who is based in the control room at Drax Power Station. Lee started his career as an industrial chemist before working in operations at Eggborough Power Ltd, where he was then promoted to Unit 3 Operator. After being made redundant when the plant closed in 2017, Lee spent another 3 years in the chemical industry before joining Hargreaves in 2020.

"The control room where I am based is the heart of Hargreaves' operations at Drax, connecting operations with maintenance, management, and Drax itself. What I find most rewarding is ensuring the team operates both smoothly and safely, efficiently addressing issues to maintain continuous plant operation. I've gained a deeper understanding of how maintenance departments function within both Hargreaves and Drax and how proactively identifying potential issues minimises the risk and impact of plant failures."

Lee is also advancing his skills by working towards his NVQ Level 2 Engineering Operative qualification. We are proud to have Lee as part of our operations and look forward to his continued contributions and success.
